Vote 15-156: Messerschmidt, Mickelson, Sandager, Trimble...4 yes  
Trevillyan... 1 abstain due to potential conflict of interest  
Motion carried.

On Item 4(p) Approval of 28E Agreement Regarding Funding and Operation of Aquifer Storage and Recovery Facility - West Des Moines Water Works

Council member Trevillyan stated he will abstain on this item due to a potential conflict of interest.

Council member Trimble requested clarification on this item.

City Manager Tom Hadden explained this agreement is a win-win situation, because Des Moines Waterworks will operate and maintain the facility, but West Des Moines Water Works will benefit by gaining additional capacity at a reduced rate.

Dianna Wilson, General Manager for West Des Moines Water Works, added that this agreement was vetted thoroughly, and the additional capacity will be needed as the area develops. She noted if additional capacity is needed in the future, a site has already been approved by the Iowa Department of Natural Resources for West Des Moines Water Works to construct its own Aquifer Storage and Recovery Facility.

May 4, 2015

It was moved by Trimble, second by Mickelson to approve Item 4(p) Approval of 28E Agreement Regarding Funding and Operation of Aquifer Storage and Recovery Facility - West Des Moines Water Works.

On Item 6(b) Mayor Gaer indicated this was the time and place for a public hearing to consider Barnes Heights Sanitary Sewer Connection Fee District, generally located south of Ashworth Road and west of 60th Street, initiated by the City of West Des Moines. He asked for the date the notice was published and the City Clerk indicated the notice was published on April 17, 2015 and April 24, 2015 in the Des Moines Register. Mayor Gaer asked if any written comments had been received. The City Clerk stated one correspondence was received and is included with the Council communication.

May 4, 2015

Mayor Gaer asked if there were any public comments.

Karen Lonsdale, 6160 Ashworth Road, inquired about what property owners will be required to do with septic tanks after discontinuing their use, where the sewer connections will be, how the \$7,700 shall be paid to the City, who will be doing the project, and how did they get the contract.

Ed Bowden, 6220 Brookview Drive, inquired if the City surveyed the 18 property owners, and if so, how many were in favor of establishing a sewer district. He also inquired if the residents would have input regarding what kind of system will be installed, how it will be installed, and if there are options being considered other than a low pressure system. He also inquired how the \$7,700 cost was determined. He stated he feels the City has fallen short by planning the areas around the Barnes Heights development without taking it into consideration.

Kristopher Buldhaupt, 6008 Ashworth Road, spoke in opposition to the proposed sanitary sewer connection fee district, stating he bought his home because he wanted a septic system. He inquired what is the driving force behind the proposed sanitary sewer connection fee district and how would it benefit the property owners.

Terry Pearce, 6010 Ashworth Road, stated he believes the cost for this sewer line could have been much less had it been designed for a gravity sewer line when the surrounding developments were constructed.

Carrie Mineck, 6275 Brookview Drive, inquired if the property owners are obligated to participate and inquired what the City's financial responsibility will be. She also requested information about how the cost would increase for property owners that don't hook onto the sewer immediately and asked what the City participation would be and if any additional aid was available.

Ron Williams, 6250 Ashworth Road, stated he bought his home because he wanted a septic system rather than sewer service. He inquired what the City's motivation is for the proposed sanitary sewer connection fee district.

Harry Alley, 6140 Ashworth Road, stated his understanding is that if a property owner chooses to not hook onto the sewer at this time, they would be required to when they try to sell their house. He also stated many of the property owners in this development are not able to easily afford the cost of hooking onto the sewer.

Mayor Gaer asked if there were any additional public comments; hearing none he declared the public hearing closed.

Duane Wittstock, City Engineer, responded to the public hearing questions, stating under the proposed sanitary sewer connection fee district the City won't require anybody to hook onto the sewer unless Dallas County sends a notice of a failed septic system to the property owner. The

May 4, 2015

purpose for the district is to give property owners a place to hook onto the public sewer if their septic systems should fail and cannot be fixed. The property owner's responsibility for discontinued septic systems will be determined by the Dallas County Sanitarian, but they are generally required to have the septic tank pumped and then filled with sand. At the public meetings, the property owners in attendance have been split evenly between those in favor of the proposed sanitary sewer connection fee district and those opposed to it. A consensus was reached by the attendees at the last public meeting that if a sewer is to be constructed, a low pressure system would be the best alternative because it is the most economical option in this case, and it would involve the sewer line being constructed in the street right-of-way, to which property owners could connect by installing a sewer line from their home to the sewer line at their expense. Mr. Wittstock noted, although it is not an issue with the city or county, there have been reports of mortgage companies at the time of sale requiring homes to be connected to the public sewer system if one is available. The sewer district fee would be due and payable when a property owner requires service, and the fee would need to be paid in full, as the Council has not authorized any option of a payment plan. The fee will inflate annually with the Engineering News Record Construction Price Index. The \$7,700 fee is based on the cost estimate prepared by Veenstra & Kimm, and if the project cost exceeds the estimate, the City will bear the responsibility for the excess cost. Mr. Wittstock responded to additional questions, stating the gravity sewer option would have caused more disruption to the backyards of homes because the trench would need to be dug much deeper and wider than for a low pressure system. The driving force behind the proposed sanitary sewer connection fee district was a directive from the Council to identify areas of the city without sewer service and to provide opportunities for property owners with failing septic systems to connect to a sewer. The obligations of property owners, at the time they connect to the sewer, would be to abandon the septic system, install the pit, pump, and service line to the public sewer line, provide the electrical service and plumbing permit, and pay the fee in advance. The City's participation has been facilitating the process to create the sewer fee district, but no further participation has been approved by the Council. Mr. Wittstock recommended this item be continued and sent to the Public Works Subcommittee to be vetted again and to see if any new information comes up.

It was moved by Messerschmidt, second by Trevillyan to continue Item 6(b) Barnes Heights Sanitary Sewer Connection Fee District indefinitely and to refer the item to the Public Works Subcommittee.

Vote 15-166: Messerschmidt, Mickelson, Sandager, Trevillyan, Trimble...5 yes  
Motion carried.

On Item 6(c) Mayor Gaer indicated this was the time and place for a public hearing to consider Amendment #3 to the Westtown V Urban Renewal Area, initiated by the City of West Des Moines. He asked for the date the notice was published and the City Clerk indicated the notice was published on April 17, 2015 in the Des Moines Register.
