On Item 6(a) Mayor Gaer indicated this was the time and place for a public hearing to consider Delavan Townhomes, 2101 Delavan Drive - Amend Comprehensive Plan Land Use Map to Change approx. 2.24 acres from Office to Medium Density Residential and Amend BEH II Planned Unit Development (PUD) to Allow Development of 16 Attached Townhome Units, initiated by Capital Homes of Iowa (Continued from October 19, 2015 and November 2, 2015). He asked for the date the notice was published and the City Clerk indicated the notice was published on October 2, 2015 in the Des Moines Register. Mayor Gaer asked if any written comments had been received. The City Clerk stated on a vote of 4-0, with three members absent, the Plan and Zoning Commission recommended City Council approval of the comprehensive plan amendment and rezoning request, and one correspondence was received which was included with the Council communication.

Mayor Gaer asked if there were any public comments.

Ed Arp, Civil Engineering Consultants, representing Capital Homes of Iowa, explained the parcel is currently zoned office on the western portion and light industrial on the eastern portion. The proposed request is to rezone the western portion to multi-family for townhouses and maintain the eastern portion's zoning as light industrial.

Eloise Gardner, 2505 Countryside Place, expressed opposition to the proposed development, citing concerns about increased traffic on South 26th Street, which is the primary access from EP True Parkway into her neighborhood. She stated the curve on EP True Parkway and the bike trail already pose challenges at that intersection, so she is concerned about potential safety hazards and potential back-ups of traffic waiting to turn on EP True Parkway. She suggested widening

November 16, 2015

South 26th Street, just south of EP True Parkway to add a second northbound lane approaching EP True Parkway.

Janet Seeberger, 2509 Countryside Drive, expressed opposition to the proposed development, citing concerns about potential safety hazards and access issues for the neighborhood.

Sandy Roan, 221 South 28th Street, inquired if the traffic study for this area was conducted while school was in session, because that would have a significant impact on the results. She also expressed concerns about traffic speeding on EP True Parkway.

John Sheeley, 2504 Countryside Drive, expressed opposition to the proposed development, reiterating the concerns of the other residents that have spoken.

Mayor Gaer asked if there were any additional public comments; hearing none he declared the public hearing closed.

Duane Wittstock, City Engineer, explained the traffic study, which was conducted in early September after school was in session, was conducted assuming the development would be occupied by 21 residential units and mini-storage units. During the peak morning hour, the development would generate nine new trips, and during the peak evening hour, it would generate eleven new trips. The developer was also open to developing the entire parcel as mini-storage units, which would generate fewer peak hour trips, but the residents in attendance at a public meeting expressed a preference to include the multi-family residential on the western portion of the parcel. He stated South 26th Street could be widened to allow for a left turn lane, but staff doesn't believe the situation would warrant it at this point in time, based on the number of trips on it and the fact that there are four alternate accesses onto EP True Parkway. He was asked to estimate the cost for such a widening project, and he estimated it would cost approximately \$150,000. He also stated the traffic for the mini-storage would only have access via Delavan Drive, while the townhome development would only have access via South 26th Street.

Council member Trimble requested staff monitor traffic patterns in this area to determine if widening South 26th Street might be warranted in the future.

Mr. Wittstock noted it will be at least a year before the issue manifests itself because of the current time of year and the length of time required to construct the project, so if warranted, the project could be considered during the following year's budget cycle.

Council member Trimble inquired about the possibility of installing yield signs or stop signs along the bike trail where it intersects a street.

Gary Scott, Parks and Recreation Director, responded the pedestrians by law have the right of way, and bicycles on the trail are considered pedestrians, which is why the City has chosen not to install such signage in the past. He stated staff can look into the issue.

November 16, 2015

Mayor Gaer asked staff to add the issue of signage on bike trails to the agenda for the next meeting of the Public Safety Subcommittee.

He asked for the date the notice was published and the City Clerk indicated the notice was published on October 30, 2015 in the Des Moines Register.
